Re: We, the Mendocino Coast Cooperative Weed Management Area, are requesting a waiver of dump fees in the amount of \$4000 to dispose of gorse debris in connection with our proposed Gorse Containment Project. In return, we will conduct treatment of 8 net acres of gorse on the Caspar Transfer Station. The project period is 1/1/07 to 12/31/08. The treatments will occur during this time.

Dear Tara:

As per your request, the Mendocino County Solid Waste Division hereby commits to 50% matching funds not to exceed \$4000.00, for the removal and treatment by your organization, of gorse from the Caspar Transfer Station property, located at 75000 Prairie Way, Caspar, California. This amount will be paid as a credit towards disposal fees for the disposal of gorse, at the rate of \$18.50 per cubic yard (\$19.00 per cubic yard after January 1, 2007) and for any labor or equipment provided by the Solid Waste Division for the purpose of assisting in the removal of gorse from Caspar Transfer Station property. Labor and equipment hours will be charged out as "fully weighted" hours against the above mentioned credit.

Thank you for considering us for this project. We appreciate your efforts.

Regards: *Oscar Centoni*

Oscar Centoni, Acting Deputy Director Transportation, Solid Waste Division
